

# PATH-TEC™ SpectraLogix

## LABORATORY COURIER MANAGEMENT SOLUTION

SpectraLogix is part of a comprehensive web-based solution that assists laboratories in effectively managing all of the critical specimen transport functions such as courier scheduling, route management, supply tracking, specimen reconciliation and reporting.

## EASILY TRACK COURIERS, LOCATIONS AND JOBS

- View maps that show your couriers' locations
- Generate reports that summarize pickups and deliveries
- Stay informed about courier arrival and departure times at job locations
- Best fit scenarios for easy courier dispatching
- Real-time dashboards for route management

## INTUITIVE MOBILE APPLICATION CONVENIENCE

- Generate real-time client supply orders
- Track supply deliveries and specimen pickups
- Improve courier routing, tracking and communication
- Navigate from current location to next job

## CAPTURE ACCURATE, REAL-TIME INFORMATION

- Eliminate paperwork by using mobile forms to record supply deliveries, specimen pickups, inventory usage, customer signatures or custom information
- Picture capture, location scanning validation
- Communicate with couriers through messaging center
- Proactively track supply deliveries and specimen pickups
- Easily reconcile specimens and record any discrepancies

## GENERATE POWERFUL SUMMARIES AND REPORTS

- Import reports into back-office systems to assess productivity, job costing, expense management and more
- Track performance metrics for couriers
- View reports for specimen pickup discrepancies
- Analyze specimen volume by location and easily identify zero pickups

## IMPROVE SERVICE LEVELS

- Increase processing efficiencies through route optimization
- Create and update jobs from the web console
- Easily send job updates to couriers automatically when the previous job is completed, or create recurring jobs

## GENERATE ROI QUICKLY

- Analyze pickup and delivery times to reduce costs
- Create reports to analyze trends and improve business performance
- Improve courier utilization to reduce labor expense and generate revenue
