

SpectraPath offers advanced RFID tracking that greatly improves tracking and inventory management efficiency for laboratories. SpectraPath's proprietary tracking software features both location and temperature tracking, allowing labs to validate specimen quality before beginning expensive test procedures.

SMART INVENTORY MANAGEMENT BENEFITS

- Improve inventory management
- Reduce manual work and labor costs
- Increase efficiency
- Increase visibility and accuracy
- Reduce inventory costs
- Increase client satisfaction
- Reduce stock-outs and expedited shipments
- Improve quality assurance
- Track specimen integrity
- Receive accurate real-time information

INNOVATIVE INVENTORY TRACKING

- Tag is tied to lot/tracking number
- Passive RFID tag on all kits
- Track type of kit, the expiration date, and which customer the kit came from
- Client's inventory automatically reduced
- Detailed supply receipt & usage reports

TEMPERATURE TRACKING

- Track temperature inside kits
- Set custom temperature parameters and ranges
- Visual alerts for temperature readings
- Quickly identify specimens that have gone out of range
- Detailed trip reports on temperature ranges
- Reduce time spent analyzing potentially bad specimens
